## WORK EXPERIENCE

---

### Growkar

Remote

Web Development Intern

May 2023 - July 2023

- Developed a full-stack website using React, Node.js, HTML, and CSS.
- Collaborated with a team to ensure seamless integration of frontend and backend components
- This internship provided hands-on experience in full-stack web development and honed my collaboration skills to deliver an enhanced user experience.

## PROJECTS

---

### DropRO

- **Tech Stack** : React , solidity, Web3Storage(IPFS), Alchemy RPC's
- DropRo is an decentralized webApp for secure data storage enabling easy uploads , collaborative sharing with controlled access
- Implemented an Smart contract uploading metadata of any document uploaded by user

### JUST

- **Tech Stack** : React , solidity, ethers , Subgraphs , Mumbai chain
- It's an NFT Marketplace with decentralized subgraph integrations providing user the ability to effortlessly list , buy or cancel or update Nft listing for a seamless trading experience
- Implemented an optimized contract with different functionalities tested with hardhat

## CONTRIBUTIONS

---

- **Wizard** at **Lumos** Community : participating in discussions and collaborating with fellow developers to explore share with others
- **Dev Advocate** at **The Graph** : Engaging with the Graph Community for sharing DAAP's development using subgraphs

## SKILLS

---

**Language** : Solidity , JavaScript , C/C++ , MYSQL , Python

**Libraries/widgets** : Web3Storage, React, Node , GraphQL , Hardhat , Tailwind

**Protocols** : The Graph , ChainLink , Alchemy , IPFS

## EDUCATION

---

**ST. Vincent Pallotti College Of Engineering and Technology ,Nagpur**  
Bachelor of Technology in Computer Engineering

2020-2024  
9.18 GPA
